TORINO CONFERENCE TABLE

Drawing inspiration from the lively and elegant city at the foot of the Alps, the Torino Conference Table brings a feeling of strength, style and excellent performance to meeting rooms. The combination of materials procured, excellent craftsmanship and state of the art technology create a table that is both beautiful and powerful. The legs are true 4x4s with a solid surface top that is 0.5" thick. The four legs appear to punch through the countertop and celebrate the structure and fabrication of the piece itself.
